

Jihyung Park

jihyung803@gmail.com | [LinkedIn](#) | [GitHub](#) | [Google Scholar](#)

Education

University of Texas at Austin

Master of Science in Computer Science

GPA: 3.89

Aug 2025 – May 2026

University of Texas at Dallas

Bachelor of Science in Computer Science

GPA: 3.94

Aug 2020 – May 2024

Experience

Turing

LLM Trainer

Palo Alto, CA (Remote)

Sep 2025 – Dec 2025

- Designed dialogue simulations that leverage sequential tool calls to access essential information, activating functions only when needed and keeping conversations natural and engaging.

Urban Information Lab, University of Texas at Austin

Austin, TX

Graduate Research Assistant | Advisor: Dr. Junfeng Jiao

Jan 2025 – May 2026

- Built **SafeMate**, with City of Austin, an emergency-response chatbot with the City of Austin, integrating RAPTOR-based RAG over 100+ official safety documents and 25 external tools using FastAPI, LangChain, MongoDB, Docker, and React.
- Developed **AERIC**, a low-latency LLM safety monitor using hidden-state signals to anticipate implicit harmful dialogue, improving AUROC over streaming guard baselines with only 2.34% latency overhead.

Human Language Technology Research Institute, University of Texas at Dallas

Richardson, TX

Undergraduate Research Assistant | Advisor: Dr. Vincent Ng

Dec 2023 – Jan 2025

- Developed **MemelInterpret** dataset unifying meme categorization, interpretation, and explanation, demonstrating cross-task gains across LMs, LLMs, and LVLMs.

Publication

- Jihyung Park**, S. Afroogh, and J. Jiao, "AERIC: Anticipatory Hidden-State Monitoring for Implicit Harmful Dialogue," *Neurips*, under review, 2026.
- Jihyung Park***, M. Huang*, L. Liu, and E. Stangel-Eskin, "PragReST: Self-Reinforcing Counterfactual Reasoning for Pragmatic Language Understanding," *ARR*, under review, 2026.
- J. Park, K. P. N. Nguyen, **Jihyung Park**, M. Kim, J. Lee, J. W. Choi, K. Ganta, P. A. Kasu, R. Sarakinti, S. Vippera, S. Sathanapalli, N. Vaghani, and V. Ng, "MemelInterpret: Towards an All-in-One Dataset for Meme Understanding," *EMNLP Findings*, 2025.
- Y. Xu, **Jihyung Park**, and J. Jiao, "LLM-Powered Digital Twins for Interactive Urban Mobility Simulation: Integrating SUMO with AI Agents," *NeurIPS UrbanAI Workshop*, 2025.
- S. H. Lewis, J. Jiao, Y. Xu, **Jihyung Park**, and C. Phillips, "A Decentralized Digital Twin via Crowdsourced Sensing and Browser-Based Edge Computation," *AAAI AI4UP Workshop*, 2026.

Project

- Built a local AI program with 1-bit LLMs to improve automated data preprocessing by detecting and handling outliers, missing values, typos, and noisy records in structured datasets.
- Built a SUMO traffic optimization system that integrates regional traffic data into simulation environments and uses reinforcement learning to recommend system designs.

Skill

Programming Languages

Python, Java, TypeScript/JavaScript, C++, HTML/CSS, Shell

Frameworks and Libraries

React.js, Node.js, FastAPI, PyTorch, Langchain

Platforms and Technologies

MongoDB, SQL, Docker, Git, Firebase, AWS
